Patients currently in the Clebre Method: 30
Patients cured: 3

Fundraising (seed):

EUR 2.000.000 for 25%

Valuation of EUR 8.000.000

Clebre solves the problem of lack of quality sleep data and uncoordinated patient care.

Clebre has developed a sensor, currently at the MVP stage (TRL 7). This sensor streamlines processes, reduces costs, and facilitates home-based diagnosis and monitoring. Guided by our app, patients can navigate the entire process seamlessly.

Clebre aims to establish a network of subcontractor clinics. Through partnerships, we plan to provide holistic care for patients, enhancing their overall experience and outcomes.

Our team has seven full-time members, including the most experienced ENT specialist in Poland, programmers, and a team of advisors.

Development plan

Seed funding
Early 2024

CE certification
Q3/Q4 2024

Pilot trial + process digitalization
Q3 2024- Q1 2025

MDR certification IIA
2024-2025

Scaling
Early 2026
